DATA

We use data to make decisions each and every day.

What if you kept your alarm clock in the basement, not next to your bed?

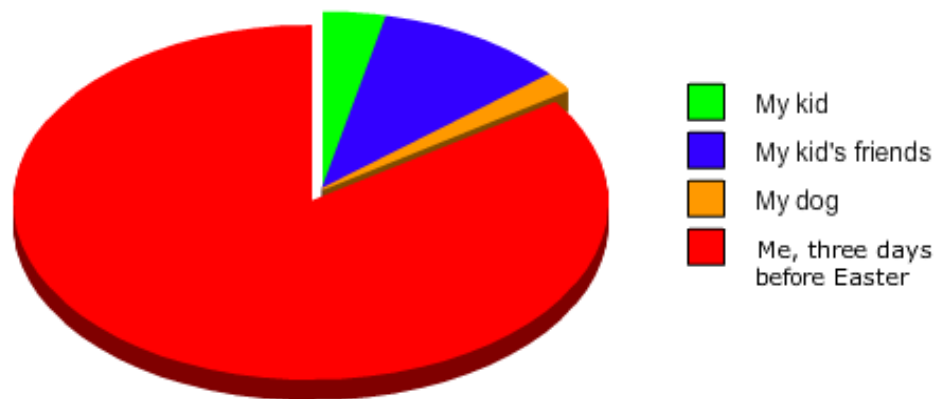

What if you had to email the utility company to adjust your shower temperature?

What if you had to consult five agencies to get a weather report?

Who ate my kid's Easter Candy?

Data Portal

Welcome to EnviroHealthLink [learn more...](#)

The Kentucky Environmental Public Health Tracking (EPHT) Network provides information and data about how the environment affects human health. Use this website to answer questions about air quality, drinking water, cancer, and a wide variety of other topics.

At this website you may:

- Explore health and environmental data by topic, county, and year.
- Generate custom tables, charts, and maps.
- View reports for certain environmental hazards, exposures, and health effects in Kentucky.
- View trends in data over time.
- Find links to national and Kentucky-specific resources on health and environmental topics.

See the [Contents and Usage](#) page for more information.

About Kentucky Environmental Public Health Tracking

The Kentucky Environmental Public Health Tracking Network provides a public web-based application for health and environmental data dissemination. Kentucky is part of the [National Tracking Network](#), created in partnership with the Centers for Disease Control and Prevention (CDC) to provide data about environmental hazards, exposures and health effects. Please see the [What is Environmental Public Health Tracking?](#) page for more information.
